

**BARETZKY & ASSOCIATES**  
CYBER AML / ATF RISK QA AUDITING™

***93% Of All Our Clients Are  
Victims Of Cyber-Terror  
Do you WannaCry?***

**JUST HOW EASY A CYBER TERROR  
TARGET FOR THE MOTIVATED AND  
PROFESSIONAL ADVERSARY IS YOUR  
ORGANIZATION ?**

**Baretzky & Associates** Evolution Threat Monitor provides an Adversarial Assessment using OPENSOURCE INTELLIGENCE (OSINT) sensors on the dark web to seek out and capture potentially exploitable information about your organization.

For organizations seeking a real-world view of what information malicious actors can find about them on the open and dark web. Our data collection spans seven years in most languages covering the most important sources to discover when your company's information is leaked online, bad guys are talking about attacking you, or exploit code is being developed that can compromise your infrastructure.

*"We cover over 750,000 data sources from the deep and dark web, underground forums, to social media"*

Unlike "boiler rooms" of human analysts working manually, our service automatically collects and analyses intelligence from technical, open, and dark web sources. We deliver radically more context than threat feeds alone, updates in real time so intelligence stays relevant, and packages information ready for human analysis or instant integration with your existing security stack.

**Our adversary assessment report provides insight and mitigation recommendations into the following:**

- Leaked credentials
- Negative sentiment company chatter
- Repository code and files exposed
- Exposed company web servers and databases
- Insecure infrastructure
- Deep & Dark web markets where company sensitive information is traded
- Mentions of company IP's, Domains, or Files

**IF YOU ARE CONCERNED OR CURIOUS  
ABOUT THE INFORMATION  
AVAILABLE IN THE DEEP WEB,  
UNDERGROUND SITES AND IN  
HACKER FORUMS THEN DO GET IN  
TOUCH AS PREVENTING SECURITY  
BREACHES IS WHAT  
WE DO !**

**Get CyberPOL  
AML / ATF  
QA Certified™**

## TESTING, AUDIT AND MANAGED SERVICES IN OUR SERVICE PORTFOLIO INCLUDE:

## BARETZKY & ASSOCIATES CYBER RISK AND ATF CERTIFICATION

The **Baretzky & Associates** and its services provides a full set of IP and IT Audit Services to facilitate a '**Seal of approval**' standing against both Intellectual Properties (Software and their uses) as well as the funding models and payment channels used in their sale and remuneration. This is key today in verifying anti-terrorism funding status of both Software Products, Online Services, and those facilities they implement.

The **Baretzky & Associates** team is cocked, locked and ready to rock to audit and demonstrate your integrity, and to in instances where Material Weaknesses are found, provide key remediation services to bring your practices to a state where they will stand before any tribunal demanding such a review.

Today, more than ever the defending of the **Children of the World** and protecting the Innocents of fraud and its damage in funding the military attacks against their very being, has become more than a watchword. **Baretzky & Associates** and its team understand these needs and have crafted a cafeteria style service practice allowing entities and all their major clients, the same power of transparency.

**Baretzky & Associates** and its partnership with **ECIPS** and **CYBERPOL** are both leading the charge and driving Industry Awareness as was just demonstrated at the UN 37 Assemblies' meeting in Geneva. **Baretzky & Associates** and team are ready.

Services from external auditing, and **ATF certification** as well as **CYBERPOL** Approved branding is available for all software products and the entities creating and reselling them. ATF and AML certification is available for any and all parties including Governments wanting to certify their own operations.

Pricing is available for smaller-entities on an hourly time-and-material basis as well as Fixed Price Retainers for larger entities and National bodies. Though this unique program all parties are provided with the same level of integrity.

From **eCurrencies** to on-line Financial and Document Escrow services, this one-size-fits-all program provides key value and will become a cornerstone of GDPR and US reporting models for all concerned.
